

Jiaheng Li

Full Stack Software Engineer

odell.lijiaheng@gmail.com

[Portfolio](#) · [GitHub](#) · Auckland, NZ

Open Work Visa to 25 Feb 2029 · No sponsorship required

Available immediately · Open to relocate

At a Glance

Experience: 3 years commercial development

Backend: Spring Boot · .NET · REST APIs

Data & Delivery: SQL · PostgreSQL · Git · CI/CD

Languages: Go · Python · Java · C# · C/C++

Frontend: React · TypeScript · HTML/CSS/JS

Systems: P2P · Concurrency · Blockchain principles

Professional Experience

Skyline Consulting Engineers Limited

Oct 2024 - Dec 2025

Part-time Full-stack Developer · Auckland

Turned structural engineers' calculation workflows into C#/.NET, React/TypeScript and PostgreSQL software. Clarified requirements with engineers and checked calculation results against analytical benchmarks.

Yonyou Network Technology Co., Ltd.

Mar 2022 - Dec 2023

Java Backend Developer · Zhengzhou, China

Developed Java/Spring services, REST integrations and accounting forms for a finance SaaS ERP. Built a quick-login gateway and refactored message processing for workloads above 100,000 records, using Kafka, MyBatis and thread pools.

Projects

[Go Kademia DHT](#)

Go · Undergraduate thesis

Implemented all four peer-discovery RPCs, XOR-distance routing and concurrent queries; integrated the DHT with a torrent-download session.

[Blockchain PKI](#)

Postgraduate research

Explored lightweight blockchain-based certificate issuance, validation and revocation, including smart-contract concepts; produced a coursework report.

[P2P Lockstep Kit](#)

TypeScript · WebRTC

Built a reusable peer-to-peer game toolkit with deterministic synchronisation and reconnect recovery, powering live games including multiplayer Mahjong.

[NX-Cast](#)

C/C++ · Embedded systems

Turned a Nintendo Switch into a media receiver supporting DLNA, IPTV and AirPlay 2, integrating FFmpeg and libmpv.

[Total-Order Multicast](#)

C# · Coursework

Implemented and tested consistent message-delivery ordering across five processes under simulated network delays.

Education

Master of Information Technology · University of Auckland · Nov 2025

Bachelor of Network Engineering · Henan University · Jun 2022

Former employers are willing to provide references.
